

THE MOTOROLA MC2100

The MC2100 satisfies the demand by many of our customers for a rugged mobile computer with a colour touch screen, data capture capabilities and Wi-Fi at a very competitive price.

George Zicman,
Senior vice president of sales,
Quest Solution

AUTOMATED INVENTORY MANAGEMENT AT ITS VERY BEST

How many times have you thought about automated inventory management for your business but dismissed the idea as being unaffordable?

It's now time to reconsider.

The Motorola MC2100 automates data capture more affordably than ever before. High-quality, great-value inventory management is now within reach.

TEN REASONS TO GIVE THE MC2100 THE GREEN LIGHT:

1. Achieve a more efficient inventory visibility in real-time

Eradicate labour intensive and inaccurate manual stock takes with very little effort.

2. Affordably achievable

The MC2100 is fantastic value for money. Plus you get many features to further improve efficiency which are usually found in much more expensive versions.

3. Lightweight and ergonomic with one-handed usability

The MC2100 is comfortable and easy-to-use. Inventory management, stock replenishment, price marking, shelf labelling. You name it, it can do it, single handed.

4. Rugged design

The MC2100 keeps on working despite inevitable drops, bumps and spills.

5. Category-leading scanning performance on any barcode

Choose the scan engine to deliver the best performance on the types of data you need to capture.

6. Push-to-talk (PTT)

Enable group broadcast and private-response PTT.

7. RhoMobile Suite develops your own applications easily

Create a single user-friendly application that looks, feels and acts the same on different devices and operating systems.

RhoMobile Suite is a powerful combination, designed to make it easier to boost your field mobility efficiency. It includes:

- * RhoElements, a powerful application development tool
- * RhoStudio, to help you simulate and debug your applications
- * RhoConnect to help integrate and synchronise with your back office systems.

8. Service from the Start with Comprehensive Coverage

Business-class support eliminates the cost of unforeseen repairs. Covering wear and tear, and internal and external components damaged through accidental breakage for the device and select accessories. It's easy to keep the MC2100 up and running and in the hands of your staff.

9. Reduce tedious, painstaking admin time

No more paper forms to complete and no more handwriting to transcribe. No more double-touch of data — capturing information on paper and then entering it onto your computer. The MC2100 will put an end to all of this!

10. Simplify your processes, accurately

Get the simplicity and information accuracy that only barcode scanning can provide, wrapped up in a value-priced device that offers all the features you need to streamline your inventory management processes.

The Motorola MC2100 is here. It's the device that's got everybody talking. Isn't it time you started to take notice?

EXPERIENCE IS EVERYTHING
